December 10, 2020

Dear Bulldog Families:

The number of new COVID cases continues to increase in our county. Yesterday, Morgan County went RED which means a high community spread of cases. The Indiana Department of Health has guidelines for school districts to follow based on the county color-code system. When a county goes red, school districts may continue in person or consider hybrid options for the district. At this time, the number of COVID cases in our school district are very low; therefore, we will not be making any changes to our school schedule.

Our masking, handwashing, distancing, and cleaning efforts are working within our schools. I appreciate everything that our staff and students are doing in this area. I encourage everyone to continue following all of the protocols and procedures pertaining to COVID-19. As I have stated in previous correspondences, please have a contingency plan in place in case our numbers increase and would have to make a change to the eLearning platform.

Thank you so much for your support!

Sincerely,
Kirk Freeman
